

# YOUR ONE-STOP SHOP FOR BARRIER RIGS

Barrier Rigs, the multi-purpose vehicles widely used by highways contractors, are a great example of how T H WHITE Lorry Cranes can cater for individual customer body building requirements, no matter how complex.

We offer a genuine one-stop service for barrier rigs with cranes, pile drivers, bespoke bodywork and accessories.

Barrier Rigs  
Bespoke bodywork  
Chassis-up build

**Palfinger** cranes  
**Orteco** pile drivers

LORRY CRANES

## When it comes to barrier rigs, T H WHITE offers the complete 'build-to-spec' solution, making it easy to configure the exact vehicle you want.

Perhaps because T H WHITE is the importer of **Palfinger** cranes, the company has earned a justified reputation for installing these premium high-tech cranes on a wide range of chassis. We will fit the most appropriate model to give you the reach and lift you need, with full stabilisation.

More recently, **Orteco** pile drivers have been added to our line-up and we will fit your barrier rig with one of these powerful, long lasting units with the capability both to drive in and pull out posts.

Body building is an essential part of the mix and starting from the bare chassis, our skilled technicians working in state-of-the-art workshops will build any kind of body to suit your application.

We can incorporate steel, alloy, GRP or cage-style drop side sections, safety rails, operative platforms and cone decks, walkways, central stairs, water tanks, storage compartments, electrical systems and work lighting.

It doesn't stop there – other options, such as hole hammers and borers can be added as required, while finished vehicles can be branded and labelled to your specification.

T H WHITE has been in business for more than 180 years and we pride ourselves on a reputation built on excellent customer service. Our commitment to you continues long after you have made a purchase.

All our Orteco barrier rigs installations come with Type Approval and 12-month parts warranty. We operate a national network of mobile service engineers, who are fully trained and qualified to ensure that your Orteco barrier rig is compliant and fully fit for purpose.

So if you are considering a new barrier rig built to the highest standards at a competitive price, talk to T H WHITE today. You might be surprised at just what we can do for you.
